Office of Energy and Mineral Resources

2023 Idaho Energy Landscape

The Governor's Office of Energy and Mineral Resources (OEMR) presents the 2023 update to the annual Idaho Energy Landscape. The strength of Idaho's economy and quality of life for its citizens depend upon access to affordable and reliable energy resources. Idaho's resilient and diversified economy is fueled by energy-dependent sectors, including technology, manufacturing, agriculture, tourism, healthcare, and construction, all of which benefit from Idaho's low cost of energy.

The 2023 Idaho Energy Landscape provides an overview of Idaho's energy profile, including energy resources, infrastructure, and major stakeholders. Additionally, the report discusses energy efficiency and conservation efforts and provides an outlook of future planned development. Also included is a robust section on minerals, highlighting Idaho's current production and future potential for domestic supply chain contributions and economic growth. The report concludes with a brief overview of energy research and educational entities in Idaho working to solve energy challenges in the state and around the globe. The state applauds their contributions towards workforce development and energy innovation.

For additional information on the 2023 Idaho Energy Landscape report, please visit the OEMR website at <https://oemr.idaho.gov> or call 208-332-1660.
