Idaho Updates

Idaho Minerals

Idaho is home to a wealth of different minerals that are featured predominantly in everyday life and in the advancement of modern science. Idaho leads the nation in producing the following minerals:

Lead, Zinc, Pumice, Cement, Phosphate, Copper, Silver & Lime

Link: "The Mineral Industry of Idaho"

Hybrid and Electric Vehicles

With gasoline prices surging nationwide, the electric vehicle market in Idaho is growing.

Link: "No its not cheaper to fill a gas powered vehicle than charge an electric one."

Renewable Energy

Over the past year the BLM has received several proposals to develop wind and solar facilities in the south central region of Idaho.

Brainteaser:

How well do you know Idaho energy?

Answer our three quick questions regarding energy to get your day off to a good start.

- 1) Idaho has some of the lowest energy costs in the nation. Electric rates in Idaho fall below the U.S. average by what percent? A) 5%
- B) 10%
- C) 20%
- D) 25%
- 2) In what year did Arco, Idaho become the 1st community in the nation to receive its entire power supply from nuclear power?
- 3) Where does the majority of Idaho's electricity come from?
- *Answers are listed on the bottom of this newsletter.

in the Magic Valley.'

Energy Efficiency

The Idaho Legislature has been discussing Energy Codes often this session. What is the purpose of energy codes?

Link: "Energy Codes 101: What are they and what is DOE's role?"

Nuclear Energy

Idaho National Laboratory has committed to achieving net-zero carbon emissions by 2021. Nuclear power plants provide more than 50% of the nation's carbon-free electricity.

How efficient is your water heater?

The average American household spends 14%-18% of their utility bill on water heating. As the weather warms up, consider these simple suggestions in "Which Water Heater is Right for You" to decrease your energy use and increase your financial savings.

An average 8 minute shower can use as much as 10 gallons of hot water. Visit the Energy Cost Calculator for Electric and Gas Water Heaters link for additional estimates on hot water consumption associated with daily tasks performed by the average consumer.

What is Driving Electric Vehicles in Idaho?

According to the Department of Energy, an electric egallon or the amount of electricity it takes to get a gallon of gas worth of energy, costs about \$.90 in Idaho. Electric pickup trucks are increasing EV adoption in Idaho, especially in rural areas. Local dealerships are receiving substantial pre-orders for the Ford F-150 Lightning, which will begin to launch in late-spring. The vehicle provides the ability to power a home throughout an outage for three days and offers a 230-300 mile range for commuting.

Look at the details further in the <u>"EV Chargers in</u> Idaho" document.

Electricity Costs in Idaho vs. Nationally

Idaho is recognized as a state that provides the most affordable electricity. Compare other states to Idaho by visiting the <u>Electricity Rates by State</u> link.

Idaho average: \$10.33 per kWh **National average**: \$13.75 per kWh
